

Aerial Work Platforms

Aerial Work Platforms - There are numerous accessories used for lift trucks that can be used so as to help expand the capabilities of your lift truck and allow you to lift things, handle materials with out difficulty or to accomplish clean-up tasks.

Many of the accessories are specifically designed to be able to fit on the forks themselves. Fork extensions for instance, are utilized if you require much more blade length, which increases lifting capability. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are another kind used whenever transporting rolled material so as to ensure it does not roll off of the traditional flat forks.

Examples of lifting accessories consist of pivoting and telescoping crane or boom accessories. They could come in quite a few different styles and are usually intended for moving poles, metal bars, lumber and various types of bulky items. Other attachments like for example different styles of hooks and hook plates are available to pick up objects making use of a chain or sling. Slab filters and magnetic filters are other things which can be utilized along with hook attachments. Slab lifters are specialized attachments which are utilized for lifting various materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your forklift to be able to make transferring rolls of carpet a lot easier. The attachment hooks onto the forklift's forks and has a pole that goes through the center of the carpet roll.

There are many types of lift truck attachment used for facility maintenance like for instance snow forks. These industrial forks could be attached to front end loaders and utilized for transporting materials like for example mulch, snow as well as dirt. Other popular cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck forks connect onto for sweeping big spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up simple and fast.

A material spreader is another lift truck accessory which is often utilized at facilities. These spreaders are useful for various applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting attachment that lots of businesses make use of everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units offered that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location making use of the forklift. Larger platform units have extra space for employees to carry tools and other essential objects for the job. Often work platforms are made of poly material or steel.
