

## Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic accessory is actually utilized on forklifts so as to squeeze items that you would like to transport using the forklift. Normally, they are utilized to paper rolls, barrels, and handle kegs, with several barrel clamp designs having the ability to rotate the load. Like for example, the rotate function permits the one operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
